Floodplain/Wetland Notice for Future Characterization and Remediation Activities

Raymond I. Greenberg, Director, Rocky Flats/Albuquerque Production Division, EM-453, HQ

Attached is a draft generic Floodplain/Wetlands Notice of Involvement for your review and publication in the *Federal Register*. The Notice is intended to serve as the Notice of Involvement required by 10 CFR 1022 for all of the future characterization and remediation activities that we anticipate will involve floodplains or wetlands at the Rocky Flats Plant. After the generic Notice has been published, individual Floodplain/Wetland Assessments and Statements of Findings will be prepared for upcoming projects and submitted for publication as appropriate.

We anticipate that we will be able to save considerable review time and effort by publishing one Notice for all of these projects. We hope to be able to avoid delays to the scheduled characterization and remediation activities by meeting the first requirement of 10 CFR 1022 well in advance of the workplan schedule. Please contact Tricia Powell (303) 966-3260 to discuss the Notice.

Frazer R. Lockhart
Director
Environmental Restoration Division
